

Eco Club

Eco Club Member List 2018-19,

What a spectacular planet we live on. Small and vulnerable, in all its ineffable beauty and fragility, Earth. Humanity's most urgent task is to cherish and preserve it for the future. The Eco Club makes it possible for us to contribute to its welfare. The club plays an important role in creating environmental awareness and making students aware of their surroundings and the dangers they face due to the harm being inflicted on our environment.

The main objective of the Eco Club is to motivate the students to keep their surroundings and their environment clean and green, and to be considerate and sensitive towards wildlife. One of the major activities that the club undertakes to engage students in the conservation of our environment is the planting of saplings which creates a direct sense of attachment with nature, and conducting the Green Olympiad, among others. Every Earth Day, various events are held to demonstrate

support for environmental protection. Our school's Eco Club also motivates students to come forward with their ideas on how we, as a school club, and students, can tackle environmental issues around us.
